- Proficient understanding of web markup, including HTML5, CSS3, LESS and SASS.
- Software Development following OOPs, Coding Standards, Best Practices, PHP PSR Standards and Design Patterns
- Working knowledge of Docker
- Strong unit test and debugging skills

## KEY PROJECTS

### Healthcare Security & Compliance Platform (React, Laravel)

- A comprehensive healthcare solution that combines security, compliance, managed cloud services, and consulting capabilities into a single platform.
- The system is designed to help healthcare organisations improve data protection, meet regulatory requirements, and strengthen operational resilience.
- Built with Laravel and Angular, the platform supports secure workflows, compliance assessments, cloud management, and risk mitigation to ensure organisations remain secure, compliant, and future-ready.

### Port Clearance & Freight Forwarding System (React, Laravel)

- A digital operations platform built for a freight-forwarding company to modernise port-clearance workflows.
- The system replaces decades of Excel-based processes with a centralised solution for container tracking, documentation management, and ministry invoice generation.
- Developed in Laravel, the platform improves operational accuracy, reduces manual effort, and enables the business to scale efficiently while meeting tight port-clearance deadlines.

### Learning Management System (React, Symfony)

- An enterprise platform for corporate learning and training, packed with features like Catalog, Content, Missions, Live Sessions, Community Feed, Rewards, Messaging, and Leaderboards.
- I built the React frontend from scratch and contributed to backend features such as Polls, Surveys, Catalog, and Reports.
- Created react storybook and components by using by MUI, Chakra-UI and custom styling.

### Virtual Event Application (React, Laravel)

- A robust solution for hosting virtual events, featuring Schedules, On-Demand & Live Sessions, Community Feed, Virtual Environments, Networking, Messaging, and Leaderboards.
- Created reusable npm components and enabled dynamic branding configuration from the backend.

### LoyaltyProgram (React, Yii, Laravel)

- A cutting-edge SaaS platform for building loyalty programs and deepening channel relationships.
- Empowering brands to connect and grow through innovative loyalty solutions.

### Khissu – Latest News & Videos (React Native, Laravel)

- Developed this mobile & web app from scratch for live news and updates.
- Integrated push notifications (Firebase), ads (AdMob & Google), and more.
